

Natural therapies

She listens and boosts your energy

Ewa Wolska was awarded the title of master in bioenergy therapy by the Crafts Chamber in Katowice.

She is also a radiesthetic expert and reiki master.

The appointment takes one hour, including a 30 – minute bioenergy therapy treatment.

She helps harmonize chakra functions, cleanses and strengthens the energy field.

Ewa Wolska from Sosnowiec supports patients with cancer and couples who are unable to have children. However, the crucial thing is that the advice given by her are a balm to the soul.

Ms Barbara used to get up every morning at 5 am. She used to prepare breakfast for her family, get dressed, put on her make-up and leave for work. In the afternoon she used to do the housework and watch TV in her spare time. Her husband had a world of his own and he stopped caring about his wife a long time ago.

And what about the daughter? Like other teenagers she preferred to share her secrets with her peers rather than reveal them to her mum.

This lonely lady had no one to talk to about her dreams, longings or worries. She got used to the idea that this would remain so forever. Soon a routine visit to a gynaecologist was to change her life dramatically.

Healer like a psychologist

- You are suffering from uterine myomas, you need a surgery - she was informed. These words made her freeze. She was unimaginably afraid of the surgery. She didn't want to undergo the surgery so much that almost immediately she found the bio-energy therapist Ewa Wolska from Sosnowiec, who was said to be an effective healer and a person very sensitive to other people's problems.

Ms Barbara confided her health and family problems to the bio-energy therapist already during the first visit.

- After each bioenergy therapy session my physical condition improved. I sorted out my life and I felt that I was still worth something – says Ms Barbara. - Then one day I visited the doctor and it turned out that the myomas vanished into the blue. I slowly started to rebuild my family relationships. Why did this happen? Because I started to rebel – she says confidently.

She's had that special something since her childhood.

- When I was a little girl, animals like cats with dislocated paws, sick dogs or birds with broken wings flocked all around me... - says Ewa. - They must have felt that I was able to help them somehow. I recall my friend from secondary school who tried to take her own life by swallowing a handful of pills. They managed to save her and later on I visited her in the hospital quite frequently. She said that she felt much better when I was around.

She can restore your will to fight

- I underwent a series of chemotherapy – Ms Mirosława recalls. - I felt really bad, I vomited after each therapy and my entire body ached. I wondered if there was any point in battling against the disease. I was sick and tired of the suffering and wanted to give up. However after several visits to Ms Ewa my will to live was restored, mainly due to the fact that I didn't feel pain any more. The bio-energy therapist provided me with psychological support. In her office a smile appeared once again on my face. Five years have passed since those days. I have overcome the tumour and today I enjoy each and every moment of my life.

- I want to help others out of the goodness of my heart – says Ewa – It also happens that somebody needs my support during a difficult time, e.g. testifying in court, taking exam. I never refuse to help, even from a distance. The distance doesn't matter when we talk about the energy.
